## Save These Instructions

Vertiv™ VR Cable Trough is an additional assembly fixed on top of the VR rack and CRV products, allowing for the passing of cables. It is applicable in micro and edge data centers.

This safety sheet contains important safety instructions. Read all safety, installation and operating instructions before installing this product. Adhere to all warnings in this safety sheet and follow all instructions.

- This product is designed for commercial/industrial use only. This product is not intended for use with life support or other U.S. FDA designated “critical” devices.
- Install and operate in a clean environment, free from moisture, flammable liquids, gases and corrosive substances.
- Use proper lifting techniques and wear appropriate, OSHA-approved PPE to avoid injury and dropping the product during removal.
- Use handling/lifting equipment rated for the weight of the product assembly. Follow OSHA ladder safety rules.
- Provide the minimum space between the accessories/components and the housing. This spacing shall be maintained for safe operation of the equipment when installed in accordance with the National Electric Code, ANSI/NFPA 70. As appropriate, all wiring and equipment should be installed in accordance with NFPA 70, “National Electrical Code,” and the applicable sections of ANSI C2, “National Electrical Safety Code.”

**WARNING!** Each cable trough assembly must have a protective-earth conductor. Protective earthing connections shall be such that disconnection of a protective earth at one point in a unit or a system does not break the protective-earthing connection to other parts or units in a system, unless the relevant hazard is removed at the same time.
