

## ADVANTAGE

### Take Advantage of this Federal Assistance Program

The digitization of education represents a fundamental shift in how students learn, how teachers and students collaborate and how districts collect and use data to improve performance.

But it can't happen without the right support. Support in terms of the IT infrastructure that allows your network to run uninterrupted, securely and with remote visibility. And support from a team of specialists to help you configure start-up and maintain the systems your network depends on.

Through the federally funded E-rate program, schools are eligible to receive discounts between 20-85% on Vertiv™ UPS, Power Distribution, and Racks/Enclosures.

## What is E-Rate?

E-Rate (also known as the Schools and Library Program of the Universal Service Fund) is a life-saver and budget extender for many schools trying to keep up with telecom and internet technology.

Eligible participants include public and most non-profit K-12 schools as well as all public and many private libraries. Program participants must carry out a competitive bidding process to select the most cost-effective companies to provide the goods

and/or services requested. Program participants may request funding in five categories of service: Telecommunications, Telecommunications Services, Internet Access, Internal Connections, and Basic Maintenance of Internal Connections. Discounts for support depend on the level of poverty and the urban/rural status of the population served(\*).

## E-Rate Eligible Products
