

# Vertiv™ NetSure™ Inverter System

Integrated AC and DC Power System

## Benefits

- Free up floor space by powering AC and DC loads in a single system with a common battery bank.
- Minimize energy consumption with 95.2% peak efficiency in normal AC-AC mode.
- Maximize site availability thanks to zero transfer time from grid to battery.
- Seamlessly manage your complete back-up solution locally or remotely through a single interface.
- Factory integrated with NetSure™ 5100 and NetSure™ 7100 power systems.

## Service

- Get the job done right by leveraging a professional team.
- Rest assured your AC/DC power plant is installed properly and configured optimally.
- Reduce risk of long-term damage and protect your warranty.
- Ensure system settings are optimized and meet your standards.

*The integrated Vertiv™ NetSure™ Inverter System powers AC and DC loads in a single factory configured-system with a common battery bank, freeing up floor space while minimizing energy loss and lowering energy consumption.*

### Improve reliability and save space

The integrated Vertiv™ NetSure™ Inverter AC and DC power system delivers outstanding reliability, modularity and scalability. With market leading power module density, the single system supports your AC and DC loads in a compact footprint. Rectifiers and inverters are connected to the same battery bank which not only facilitates zero second transfer time should commercial AC fail, but also saves space and reduces financial investment.

### Grow as you go

System sizes range from 5 kVA to 12kVA and accommodate modular 1kVA/1kW AC inverters that allow you to add inverters as your loads increase. They are available in 19" and 23" mounting widths with either 15A NEMA outlets or a bulk feed output. Factory installed inverter systems can be ordered as an option with NetSure™ 5100 or NetSure™ 7100 power systems and will be preconfigured with a common NetSure™ Control Unit (NCU) that provides a single interface for reporting and control of your AC inverter and DC rectifier modules.

### Minimize energy loss

The integrated Vertiv™ NetSure™ Inverter Series is designed for efficient operation at any load condition. All models are supported by high-efficiency Vertiv™ eSure™ rectifiers and inverters that deliver close to 95% efficiency across a wide operating range. Powering your AC and DC loads with eSure technology helps keep energy loss to a minimum and ensures your network is supported by an extremely reliable backup system.
