

Colocation and Cloud service providers have distinctive needs that are always a challenge to meet.

Your customers expect you to deliver flexibility, efficiency, and scalability that just works — without any challenge or compromise.

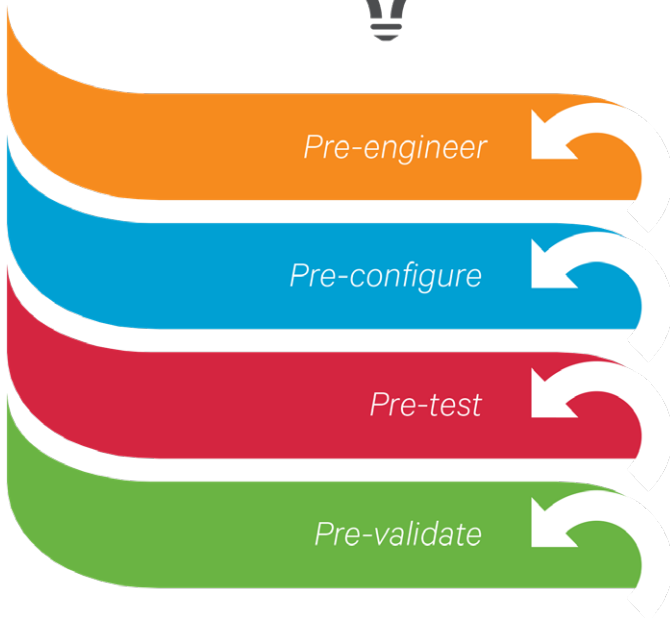

At the same time, you're constantly balancing the need for growth with the need to drive out unnecessary costs or complexity. You know you need scalable facilities with the ability to add capacity on the fly, but you can't always achieve that goal. After all, the world of data centers is always changing. Sometimes you wish you could find a partner with the same commitment to delivering high-quality, customized, scalable data centers that fit your unique requirements and don't break the bank.

Vertiv is that partner. Whether you need scalable infrastructure modules, modularly constructed facilities, or a solution tailored to your specific requirements, we can help.

At Vertiv global solutions, we make mission critical easy. Unlike traditional infrastructure partners, Vertiv global solutions takes a holistic view of your requirements. Our solutions team is here to work with you from the beginning— from developing the initial requirements all the way through project execution. And we are supported by a global manufacturing and supply chain footprint, built upon decades of technology leadership across data center and telecommunications applications.

Efficient & Personalized Process

How do we deliver distinctive solutions that fit your company's needs?

We tailor the solution for your distinctive requirements. Then we pre-engineer, pre-configure, pre-test and pre-validate the solution.

With Vertiv global solutions, you can trust us to:

- Provide designs that fit your unique needs, building and executing a scalable facility that enables you to add cooling, power, and whitespace on the fly as needed.
- Engage with IT, facilities, network and security to manage your project — from initial requirements through execution.
- Use our core competencies to drive out inefficiency. Our expertise with mass producing and customizing pre-tested, factory-integrated, multi-vendor solutions and then assembling them on-site is second to none.

Whatever you require, Vertiv global solutions keeps your systems running — and your business moving. Our combination of experience and resources allows us to better adapt to what's needed, anticipate what's next and continue to find solutions in ways other companies simply can't.
