

SmartRow™ DCX

Whether you're a head of data center operations or a data center architect, you are responsible for your organization's network closets. And that's a challenge.

You could buy different off the shelf parts and try to piece a solution together yourself, but what if you had a partner who could help.

No matter how many closets you have, you need solutions that fit your unique requirements, are flexible, scalable, and efficient, and of course, don't break the bank.

You could buy different off the shelf parts and try to piece a solution together yourself, but what if you had a partner who could help? Someone with global reach, the ability to create tailored solutions built on a framework of leading data center infrastructure products, with pre-validation and shortened deployment times — anywhere in the world?

At Vertiv global solutions, that's our promise to you.

SmartRow DCR

Our solutions for network closets are built to maximize your flexibility, scalability, and efficiency — by integrating your specific needs into our simplified, standardized designs.

SmartCabinet

Building on our industry-leading SmartCabinet™, SmartRow™ DCR, and SmartRow DCX product families, we can design and deploy your network closet infrastructure in weeks within your existing spaces, giving you better control over your ecosystem.

That optimizes performance and minimizes headaches — whether you have one closet or a thousand.

How are we different?

- Our global solutions team is here to work with you from the beginning — from developing the initial requirements all the way through project execution.
- We tailor the solution to your application while maintaining the benefits of a streamlined process.
- We manage your project by using a mix of Vertiv expertise and discipline-specific partners so you can focus on your core business.

WE MAKE MISSION CRITICAL EASY.

Vertiv global solutions keeps your systems running — and your business moving. Our combination of experience and resources allows us to better adapt to what’s needed, anticipate what’s next and continue to find solutions in ways other companies simply can’t.
